

2020 Annual Report of the Tropical Biology Section

A Summary of the Section's Activities in 2019

We offered \$1000 for two symposia or colloquia: Crop Wild Relatives and Land Races: the Sky Islands of Southwest North American Agriculture and Parasitic plants as playgrounds for genome evolution and genetic extremism at the 50th anniversary of Job Kuijt's seminal book "The Biology of Parasitic Flowering Plants".

We had a contributed paper session with two papers and two posters.

Business Meeting

A brief report of the Section's finances was presented.

Plans for 2020

We will have contributed paper session this year and associated posters, scheduled right before our business meeting. We hope that all members of the Section will try to attend the Section business meeting and/or plan to submit a symposium or colloquium proposal for our Section for Botany 2021.

With our best wishes for a productive year, and looking forward to seeing you virtually,

Margaret Devall, Travis Marsico and Suzanne Koptur
