Paleobotanical Section
Botanical Society of America

Membership Information
2005

Membership in the Paleobotanical Section of the Botanical Society of America is open to anyone interested in fossil plants. Members receive the annual *Bibliography of American Paleobotany*, which is published by the Section. The *Bibliography* not only contains the recent research publications of Section members, but also provides a convenient way of keeping abreast of research interests of Section members. A full listing of current addresses is provided in the *Bibliography*. Other publications of the Section are listed on a separate page.

At the annual meeting of the Botanical Society of America, the Paleobotanical Section has an active three day program that includes contributed papers, a banquet, and frequently symposia, workshops and field trips.

There are four membership categories in the Section: **Regular Members**, those who are also regular members of the Botanical Society of America; **Affiliate members**, those who are members of the Section, but not the Botanical Society of America; **Regular Emeritus members**, those who are also emeritus members of the Botanical Society of America; and **Affiliate Emeritus members**, those who are emeritus, but not members of the Botanical Society.

Membership dues are currently
$8.00 for Regular members
$16.00 for Affiliate members
$4.00 for Regular Emeritus members
$8.00 for Affiliate Emeritus members

Dues for the Paleobotanical Section should be sent to the Secretary-Treasurer of the Section and made payable to the Paleobotanical Section, BSA. The address for the current Secretary-Treasurer is as follows:

Art Watt died on February 5, 2005. He was the editor of the Bibliography of American Paleobotany from 1962 until 1982. During most of that time, he was serving as “Physical Science Technician” for the U.S. Geological Survey at the Smithsonian Institution’s National Museum of Natural History, a position he held from 1951 until 1980. Serge Mamay remembers Art Watt as indispensable in the field, the laboratory, and the library. He was invariably helpful and good-natured and had an impish sense of humor. A couple generations of paleobotanists have fond memories of their encounters with Art Watt from their visits to the NMNH paleobotanical collections.

Art then worked for the American Geologic Institute in Alexandria Virginia from 1981-2003. He and his wife Lorraine were married for 53 years. He is survived by his sister Roberta, his four children Dwight, Samuel, Leslie, and Deborah, seven grandchildren and one great grandchild.
